ROBESON TECHNICAL INSTITUTE

LUMBERTON, NORTH CAROLINA

*Growth...*

## in facilities . . .

Robeson Technical Institute began its life in 1965 in a classroom building and one metal shop on the Barker-Ten Mile Campus. Growth in curriculums and enrollment dictated expansion; in 1973, R.T.I. moved to a new building located north of Lumberton on 70 acres at the intersection of Highways 301 and I-95. The new brick structure of 48,000 square feet houses a library, offices, classrooms, laboratories, special skill areas, and a student lounge. Again R.T.I. has found its present facilities inadequate to house extra curriculums and a growing enrollment; therefore, contracts were awarded in December of 1974 for the construction of new buildings. Land behind the new building north of Lumberton was chosen for the site. Construction has begun on two buildings of approximately 30,000 square feet, which will house Nursing, business courses, a shop for Automotive Mechanics, Air-Conditioning and Refrigeration, Carpentry, and Masonry. These buildings should be ready for occupancy by 1976; even then both the old and new campuses will be needed to meet demands.

in programs . . .

## Cosmetology

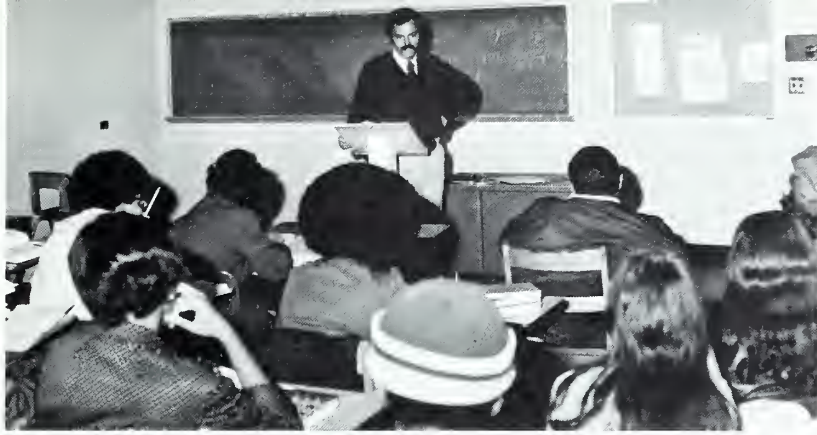

The Cosmetology Curriculum provides instruction and practice in manicuring, shampooing, permanent waving, facials, massages, scalp treatment, hair cutting, and styling. This Curriculum is approved by the North Carolina State Board of Cosmetic Art Examiners.

## Practical Nursing

The Practical Nursing Curriculum is structured to prepare students for participating in the care of patients of all ages, in various states of dependency, and with a variety of illness conditions. Graduates of the program are eligible to take the licensing examination given by the North Carolina Board of Nursing.

# Business

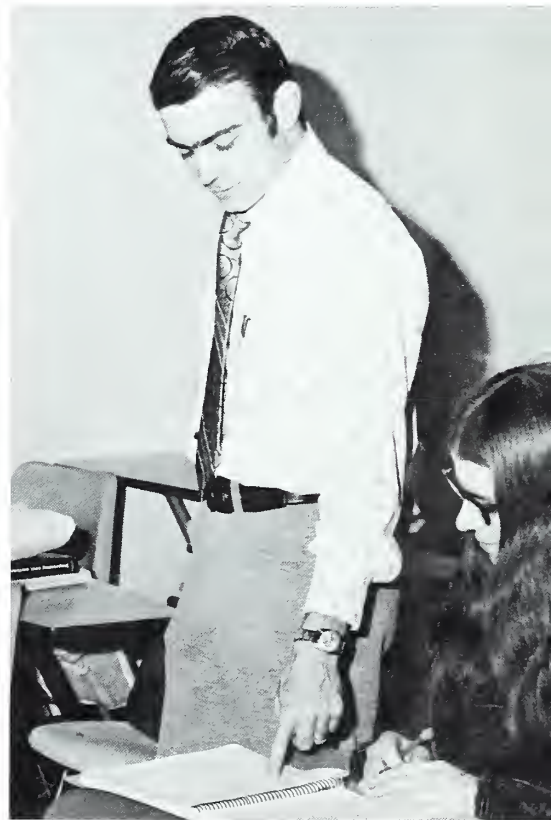

The Business Curriculum is designed to prepare the graduate for employment in many phases of business operation.

**BUSINESS ADMINISTRATION:** management trainee, salesman, supervisor.

**ACCOUNTING:** recording keeping, clerks, bookkeepers, assistant accountants.

**GENERAL OFFICE TECHNOLOGY:** administrative assistant, file clerk, machine transcriptionist, general clerical.

**SECRETARIAL SCIENCE:** stenographer, executive secretary.

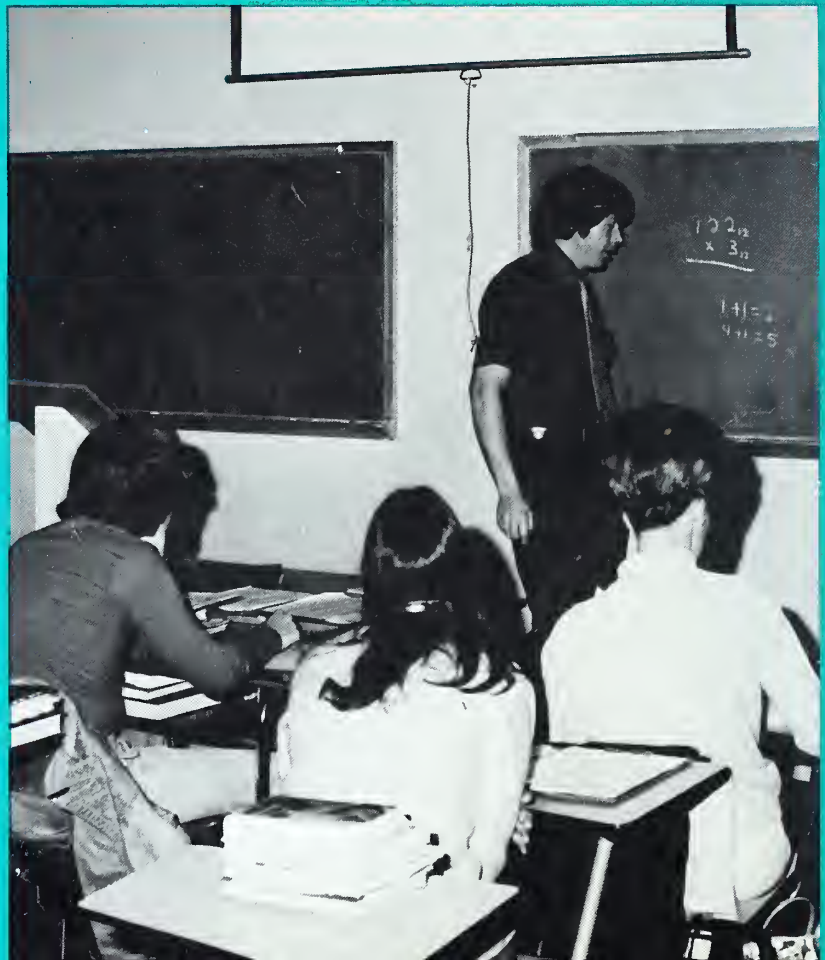

## Police Science

This curriculum provides academic training for law enforcement officers, prospective law enforcement officers, and citizens interested in the crime problem.

The student must develop a competency in investigative techniques, patrol and traffic mechanics of arrest, search, and seizure. In one year this curriculum's enrollment has increased to 80 students.

## General Education

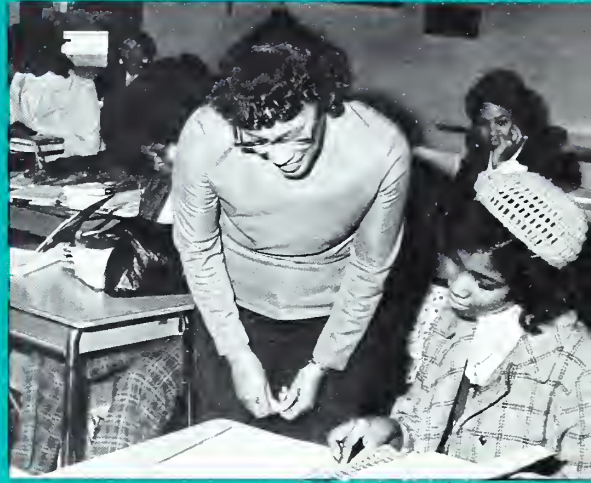

The Associate Degree General Education Program is a two-year program in which a student may complete all work toward an associate degree. Courses are those which are usually the entire requirement of the freshman and sophomore program in four-year colleges.

## Developmental Studies

The Developmental Studies Curriculum is planned to provide developmental instruction in mathematics, English, and science to strengthen the student so that he may be better prepared to enter a vocational or technical curriculum.

## Machinist

The machinist is a skilled metal worker who shapes metal parts by using machine tools and hand tools. His training and experience enable him to plan and carry through all the operations needed in turning out a machined product and to switch readily from one kind of product to another.

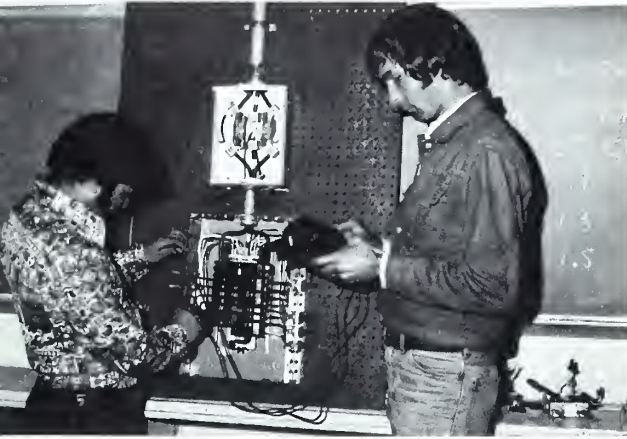

# The Building Trades

**CARPENTRY:** farming, scaffolding, finishing, millwork, cabinetmaking.

**MASONRY:** bricklaying, cement masons, stone masons.

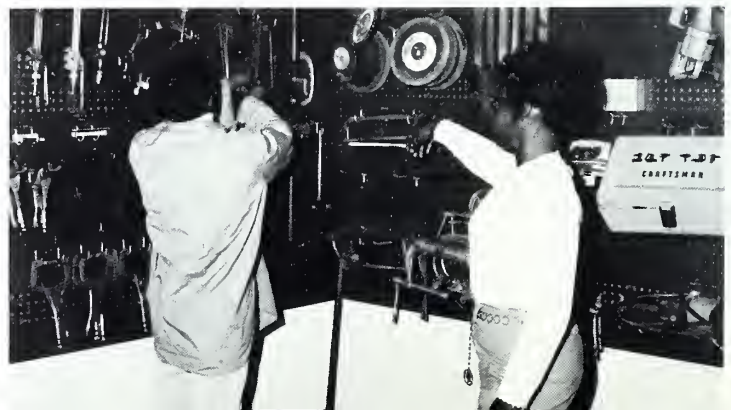

**ELECTRICAL INSTALLATION:** residential wiring, commercial wiring.

## Electrical Installation

## Welding

The Welding Curriculum gives students an understanding of the principles, methods, and techniques of oxyacetylene, arc, and inert gas welding. Practical shop work provides opportunity to attain essential skills for successful employment.

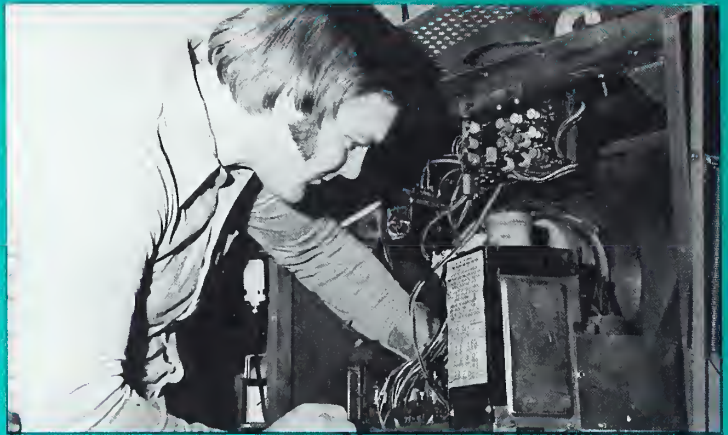

## Carpentry

## Masonry

## Radio, Television Servicing

The Radio, Television, and Electronic Servicing Curriculum provides an opportunity for attaining skill as a serviceman in installation, maintenance, and servicing of radio, television, and sound amplifier systems.

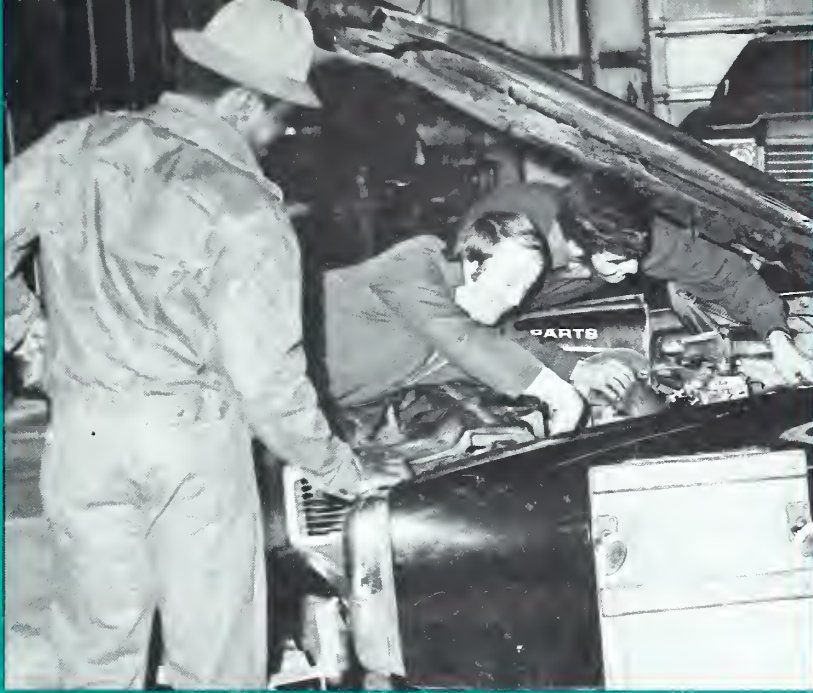

## Air Conditioning and Refrigeration

The Air Conditioning and Refrigeration Curriculum is designed to give the student practical knowledge that will enable him to become a capable serviceman in the industry. Students may be prepared for jobs in air conditioning, automatic heating, sheet metal, and commercial refrigeration installation and services.

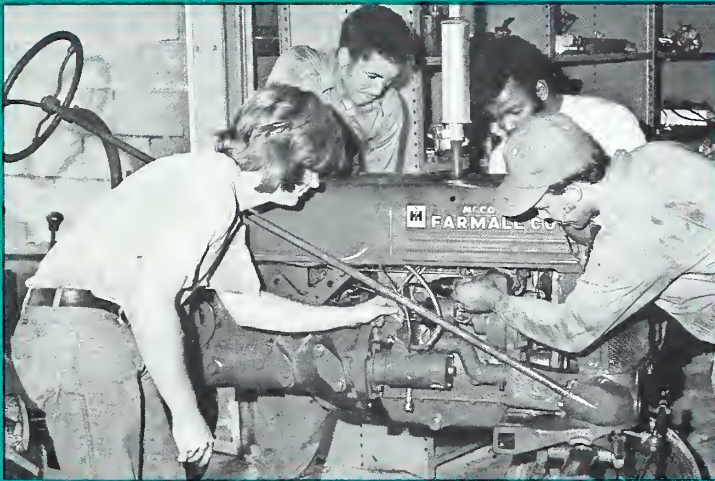

# Automotive

The Automotive Mechanics Curriculum provides a training program for developing the basic knowledge and skills needed to inspect, diagnose, adjust, and repair automotive vehicles. Manual skills are developed in practical shop work.

Graduates may find employment in the automotive service industry.

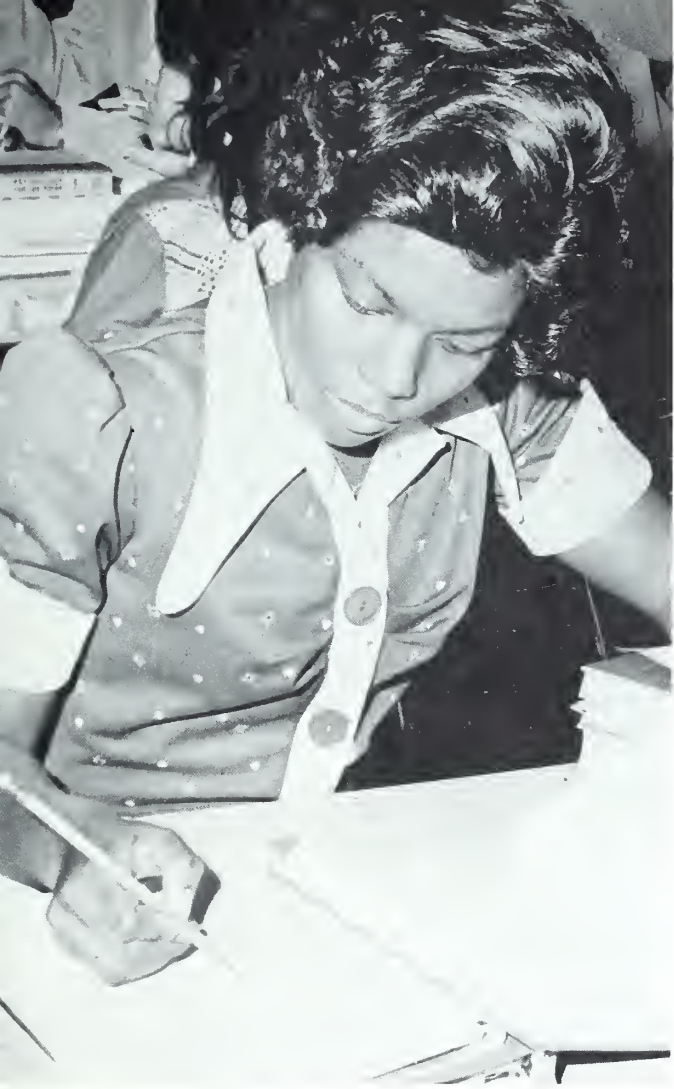

# for an expanding student enrollment.

When Robeson Technical Institute opened its doors at Barker Ten Mile on July 1, 1965, it had one goal: to fill the need for post-secondary training at the technical and vocational levels. In the beginning, the institute offered two full-time curriculums with 21 students. It now offers 13 degree programs and 11 diploma programs. From the fall of 1973, to the fall of 1974, enrollment has risen from 636 to 1,018 students. Other programs offered at R.T.I. seek to provide educational opportunities to adults for perfecting skills, for personal enrichment, and for improving basic education. During the 1973-1974 school year, 5,697 persons participated in some form of educational programs. Fall quarter 1974-1975 alone showed an enrollment of 4,686. R.T.I. is expanding to meet the needs of its students by offering new courses of study and providing comfortable facilities.

## Activities and Organizations

## Desiderata

Go placidly amid the noise and haste, and remember what peace there may be in silence. As far as possible without surrender, be on good terms with all persons. Speak your truth quietly and clearly; and listen to others, they too, have their story. Avoid loud and aggressive persons, they are vexations to the spirit. If you compare yourself with others, you may become vain and bitter; for always there will be greater and lesser persons than yourself. Enjoy your achievements as well as your plans. Keep interested in your own career, however humble; it is a real possession in the changing fortunes of time. Exercise caution in your business affairs; for the world is full of trickery. But let this not blind you to what virtue there is; many persons strive for high ideals; and everywhere life is full of heroism. Be yourself. Especially, do not feign affection. Neither be cynical about love; for in the face of all aridity and disenchantment it is perennial as the grass. Take kindly the counsel of the years, gracefully surrendering the things of youth. Nurture strength of spirit you in sudden misfortune. But do not distress yourself with imaginings. Many fears are born of fatigue and loneliness. Beyond a wholesome discipline, be gentle with yourself. You are a child of the universe, no less than the trees and the stars; you have a right to be here. And whether or not it is clear to you, no doubt the universe is unfolding as it should. Therefore, be at peace with God, whatever you conceive Him to be, and whatever your hopes and aspirations, in the noisy confusion of life keep peace with your soul. With all its sham, drudgery and broken dreams, it is still a beautiful world. Be careful. Strive to be happy.

## Who's Who in American Junior Colleges

## On Work

Always you have been told that work is a curse and labor misfortune.  
But I say to you that when you work you fulfill a part of Earth's furthest dream,  
assigned to you when the dream was born,  
And in keeping yourself with labor you are in truth loving life,  
And to love life through labor is to be intimate with life's inmost secret.

And what is it to work with love?  
It is to weave the cloth with threads drawn from your heart,  
even as if your beloved were to wear that cloth.  
It is to build a house with affection, even as if your beloved were to dwell in that house.  
It is to sow seeds with tenderness and reap the harvest with joy, even as if your beloved were to eat the fruit.  
It is to charge all things that you fashion with a breath of your own spirit.  
And to know that all the blessed dead are standing about you and watching.

From "The Prophet" by Kahlil Gibran

## Faces

For The Faculty  
They met us at the gates,  
With a plan,  
Like that of a sculptor.  
Looking at the "before",  
Searching for the "after".  
And with a smile  
They sent us on.

Robert Long

The Student  
We hurt a little, God.  
And we've said the things they said we had  
to say.  
All the questions and answers;  
Numbered and lettered and ready to recite.  
We tried to understand them,  
And we tried to stand beside them  
We stumbled sometimes,  
But We made it.

# Concluding . . .

a year of reaching toward high purposes we remember  
students disciplined by mental and physical involvement

an academic community growing in common purpose  
traditions honored and excellence recognized

The gang.

The earlier I begin my studies, the better businessman I will become.

Man and his best friend at work.

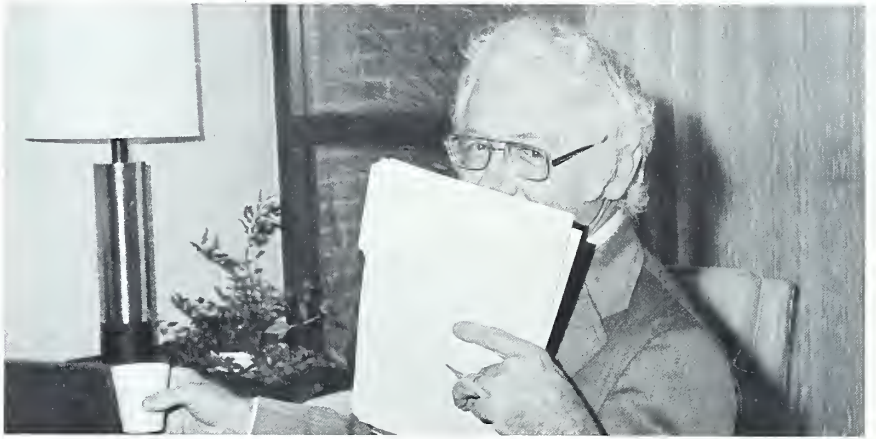

Mitchell, I'll give you twenty-five minutes to stop that.

Women's lib has arrived.

And then there was the time I was marooned on a South Sea island with Raquel Welch.

What makes you think I have been eating onions?

I'll eat this when it stops moving.

These must be your grades Janet, not mine!

You haven't heard anything yet; then she said . . .

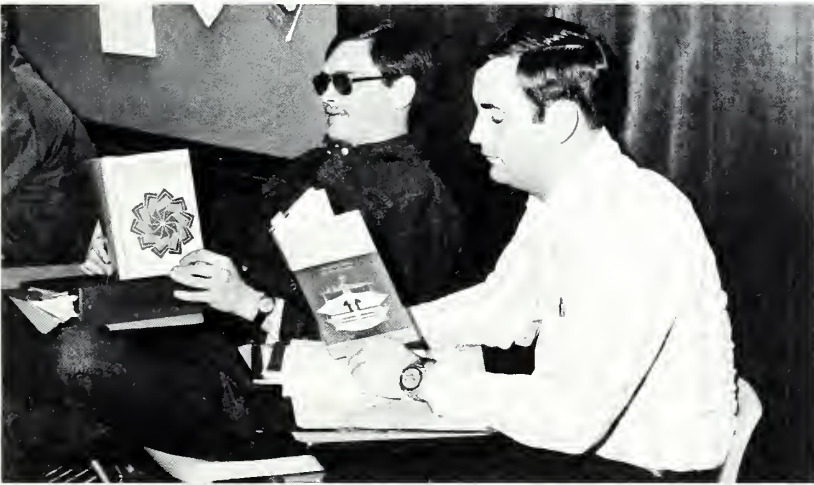

What do you mean, hit the white ball first?

Know let me see, where can I mark these cards?

Will Kathy manage another excused absence?

Wonder what they are studying, American Government or Criminal Law?

"Make no mistake, I am the President," really!!
